B-17 Flying Legend

C. During WWII, America fought a fearsome battle in the skies over Europe. From 1942–44, Germany had the advantage. Then came the B-17 Flying Fortress, the plane that beat the odds. This award-winning documentary pays tribute to the Queen of the Skies—her history, the men who flew her, the almost folkloric tales of survival at 27,000 feet in the air and 40 degrees below zero. It also highlights the need to keep the last remaining B-17s flyable for generations to come. 52 min.
